

MotionForge 3D — Movement Analysis Report

Decision-support analytics only. This report is not a medical diagnosis.

Organization	MotionForge Lab
Subject	ATH-001
Session	Controlled Squat Verification
Movement template	squat
Analysis mode	camera_plane_3d
Generated	2026-07-18T21:30:33.290450+00:00

Data quality

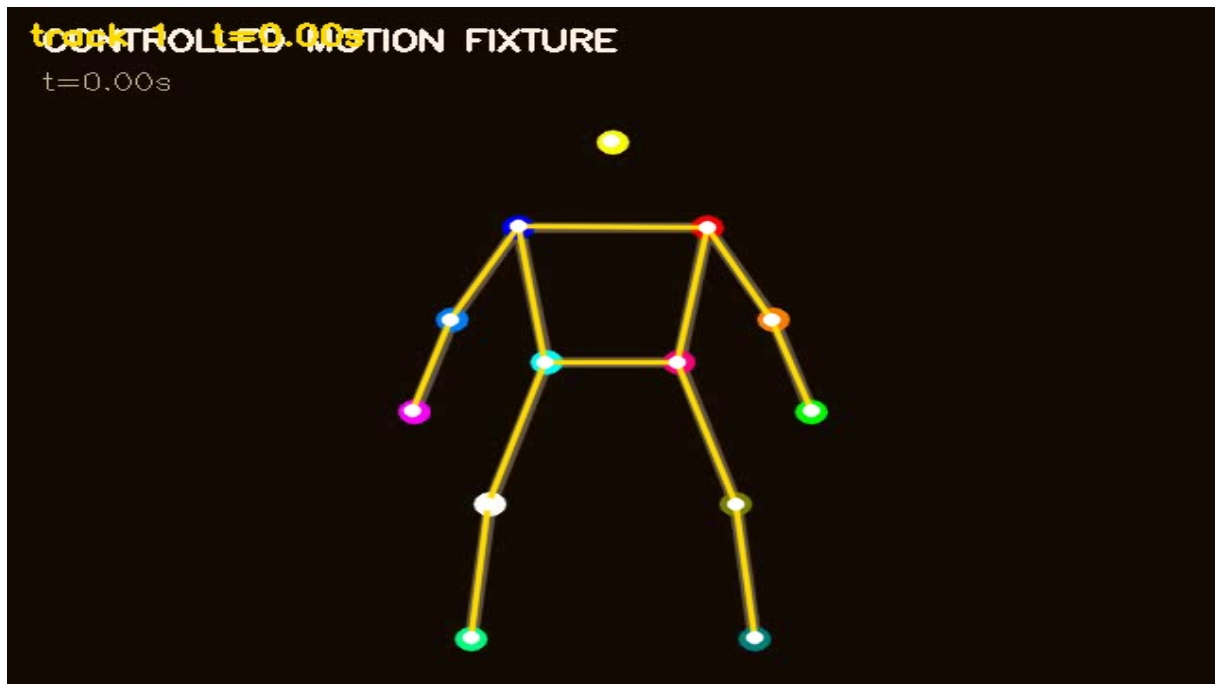

Decoded Frames	96
Analyzed Frames	32
Valid Pose Frames	32
Valid Frame Percentage	100.0
Average Landmark Confidence	1.0
Sample Fps	8.0
Source Fps	24.0
Duration S	4.0

Movement summary

Explainable score	84.52
Repetitions	2
Symmetry	96.88765899558214

Joint	Min	Max	ROM	Mean
left_elbow	171.0	171.5	0.5	171.3
right_elbow	171.0	171.7	0.8	171.3
left_shoulder	27.9	28.5	0.6	28.2
right_shoulder	27.9	28.7	0.8	28.1
left_hip	136.8	160.7	23.9	149.6
right_hip	137.3	160.3	23.0	149.9
left_knee	133.1	171.8	38.7	153.1
right_knee	134.3	171.8	37.5	154.0

Evidence

Limitations

Monocular measurements are camera-relative and not metric. Camera angle, lighting, loose clothing, occlusion, and overlapping people can reduce accuracy. Metric distances require calibration. Review generated findings before operational use.
